Based in Chessington, UK, Shutters Factory stands as a testament to British excellence in the design and manufacture of plantation shutters. Since our inception in 2010, we have committed to blending traditional craftsmanship with modern techniques to develop an extensive and diverse product range. Our commitment to quality has made us a trusted supplier of plantation shutters across the UK and Europe.

Our manufacturing facility in Romania, where we craft our renowned Mimeo composite shutters. Using advanced technology and premium materials, we ensure each shutter meets our high standards of quality and durability. This strategic location allows us to offer a remarkable delivery time of just 4-6 weeks to any location in the UK and European countries, underscoring our commitment to efficiency and client satisfaction.

We are actively seeking partnerships with shutter businesses across the UK and Central and Western European countries. By collaborating with Shutters Factory, you can elevate your end-clients' spaces with our elegant plantation shutters, renowned for their aesthetic appeal and functional excellence. Partner with us to transform any interior with our versatile shutters, designed to meet the highest standards of quality and style, and to create lasting satisfaction and loyalty among your customers.

## Shutters with integrated blackout blinds

Transform your customers' spaces with our elegant plantation shutters, now engineered for complete darkness. Our innovative blackout shutters, featuring a special frame that accommodates an integrated blackout honeycomb blind, provide unparalleled style and total light blockage. Ideal for environments where complete darkness is essential.

## Benefits of working with us

- Modern and stylish offering
- Wide range of interior applications
- Durability, robust products
- Easy installation
- Distinctive selling proposition
- Competitive pricing
- Market appeal, increasing demand
- High customer satisfaction
- Product training
- Delivery 4-6 weeks from our Romanian factory

# MIMEO

COMPOSITE SHUTTERS

Mimeo composite shutters, reinforced with aluminium, set the standard for unmatched durability and are designed to excel in any environment.

These shutters boast a decade-long 10-year warranty, affirming their position as the strongest on the market, suitable for modern and traditional decors alike.

Their sleek design, combined with ease of installation and minimal maintenance, offers superior energy efficiency and UV protection, making them the premier choice for a broad spectrum of customer needs.

# SENTRY

MDF SHUTTERS

Sentry MDF shutters are wrapped in a durable polymer coating, transforming them into a robust, highly resilient option that's both tough and affordable.

This innovative polymer-coated MDF construction ensures they stand up to the demands of any setting, offering a unique blend of strength, durability, and ease of maintenance.

Available exclusively in Pure White, their timeless aesthetics enhance any decor, providing both functional benefits and visual appeal for diverse interior design projects.

# CLASSIC

DOUGLAS FIR SHUTTERS

Crafted from Douglas fir wood, Classic wood shutters embody natural elegance and timeless charm.

They enrich any space with their authentic warmth and superior durability, making them an excellent investment for those seeking to elevate their interior design.

With the ability to offer exceptional light control, insulation, and privacy, these shutters also boast a versatile appeal that suits a wide array of design preferences, from the traditional to the contemporary.

# SELECT

ASH WOOD SHUTTERS

Select ash wood shutters, crafted from premium ash wood, showcase a luxurious grain texture and are renowned for their strength and aesthetic versatility.

They are available in a wide selection of painted and stained colours, providing unparalleled customization options to match any interior style.

These shutters not only promise to enhance the visual appeal of a space but also offer functional benefits including excellent durability, light control, and insulation, making them a preferred choice for upscale projects.

# DURA

ALUMINIUM SHUTTERS

**EXTERIOR**  
**INTERIOR**

Dura aluminium shutters represent the ultimate in modern shutter design, combining the strength and lightweight properties of aluminium with a contemporary aesthetic.

Suitable for a variety of applications, both indoor and outdoor, they are designed to withstand harsh weather conditions, ensuring long-lasting beauty and functionality.

Available in an array of colours, these shutters offer flexibility in design while providing benefits such as low maintenance, high security, and energy efficiency, making them an ideal solution for today's dynamic living environments.

	MATERIAL	COLOURS	TOP SELLING POINTS
<b>MIMEO</b> composite shutters	Composite	1	100% waterproof, 4-6wks delivery
<b>SENTRY</b> MDF shutters	High-quality MDF	1	Budget-friendly solution
<b>CLASSIC</b> wood shutters	Douglas fir wood	10	Market appeal, high demand
<b>SELECT</b> ash wood shutters	Premium ash wood	12+10	Distinctive selling proposition
<b>DURA</b> aluminium shutters	Aluminium	6+7	High-security

### Full-Height Style

The Full height shutter panels span the entire height of the window. As a further customisation, panels may have **split louvre sections** or **midrails**.

### Café Style

Cafe style shutters will only cover the lower section of a window. By default they follow the window layout but can be built as low or as high as needed. Cafe style shutters can come **with** or **without a top side frame**.

### Tier on Tier Style

This layout allows for two sets of panels on top of each other that opens independently. It provides the most control in managing airflow and light. Tier on Tier shutters may come **with** or **without a horizontal T-post**.

### Solid Panels

The Solid panel shutters were created having tradition in mind. They are a lot more beneficial at keeping light at bay when needed. Solid panels have no slats and **can be built in conjunction with any of the other styles**.

### Tracked Bi-Folding

The Tracked bi-folding style comes with panels mounted on 1 set of rails: top and bottom. The panels fold to either or both sides of the opening. This design is particularly suitable for patio doors or room dividers.

### Tracked Bi-Pass

The Tracked bi-pass configuration comes with the panels mounted on at least 2 different sets of parallel rails. In this case, the panels slide and overlay on top of each other. The panels get mounted onto the rails only and they are not hinged. This design is particularly suitable for sliding doors, wardrobe and dressing rooms.

### French Cut Doors

The French cut door configuration is meant for single opening doors. The shutter will always be full height and will allow for either a square cut or a round cut around the door handle.

### Special Shapes

Besides rectangular shaped shutters we can offer solutions for various shaped windows or openings. Odd shaped windows may have shutters too, whether they are round, oval, rake shaped or triangular.
